## Important notes regarding degree requirements

Pass-fail allowed for Free Electives only. Refer to Institute rules for maximum pass-fail credits allowed.

<sup>1</sup>BIOS 1107 and 1107L may be substituted for BIOS 1207 and 1207L; BIOS 1108 and 1108L may be substituted for BIOS 1208 and 1208L.

<sup>2</sup>Four credit hours of Biology elective may be substituted for BIOS 1208 and 1208L if a score of 5 was achieved on the AP Biology test. A maximum of 1 of these credits may be BIOS 4697 or BIOS 4699. Please discuss this option with your advisor. It is important to note that substituting for BIOS 1208 and 1208L often results in a student needing to take more than a single Biology elective class, because most Biology electives are only 3 credit hours.

<sup>3</sup>Biology lab courses: Students are required to complete two of these three lab categories: Ecology or Problem-Based Ecology Lab (BIOS 2301 or 2311); Genetics or Integrative Genetics Lab (BIOS 2601 or 2611); Cell and Molecular Biology Lab (BIOS 3451).

<sup>4</sup>The four Constitution and History Requirements must be completed before 90 credit hours and are fulfilled as follows: US HISTORY fulfilled by HIST 2111, HIST 2112, equivalent transfer/AP/IB credit, or passing the United States History Module Examination\*; US CONSTITUTION fulfilled by INTA 1200, POL 1101, PUBP 3000, equivalent transfer/AP/IB credit, equivalent transfer/AP/IB credit, or passing the United States Constitution Module Examination\*; GA HISTORY fulfilled by passing the Georgia History Module Examination; GA CONSTITUTION fulfilled by passing the Constitution of Georgia Module Examination\*. HIST 2111 or HIST 2112 may be used to fulfill both the US History requirement and count toward Social Science requirements. INTA 1200, POL 1101, or PUBP 3000 may be used to fulfill both the US Constitution requirement and count toward Social Science requirements. Note that all students must complete one of these five courses (HIST 2111, HIST 2112, INTA 1200, POL 1101, or PUBP 3000) to fulfill Core Area E requirements; courses may be completed at GT or via AP/IB/Transfer credit. \*Note that the Module Examinations do not carry any academic credit.

<sup>5</sup>The following courses meet the Quantitative Biology Course requirement (Note that MATH 1551 and MATH 1553 are pre-requisites for most of the Quantitative Requirement courses): BIOS 3400 Mathematical Models in Biology, BIOS 4150 Genomics, BIOS 4401 Experimental Design & Biostatistics (meets MCAT statistics requirement).

<sup>6</sup>The prerequisite for BIOS 3600 is either BIOS 2300, BIOS 2310, BIOS 2600, or BIOS 2610.

<sup>7</sup>The Senior Research Experience can be met with any of the following during the fourth year fall or spring semesters: BIOS 4590 Research Project Lab, BIOS 4690 Independent Research Project (requires at least one previous semester of BIOS 4699/2699).

<sup>8</sup>A minimum of 39 hours of upper division coursework (3000-level or higher) is required for all Georgia Tech undergraduate degrees. The 39 hours of upper division coursework can fulfill any category of degree requirements, including free electives and "fall-through" courses.
